# UTS: DESIGN, ARCHITECTURE & BUILDING (DAB)

UTS's Faculty of Design, Architecture and Building (DAB) consists of three schools that span the full range of architectural, design, construction, property and planning disciplines. Students learn in facilities that include computer labs, textiles workshops and photomedia studios. In the Motion Capture Lab, animation students learn to use the same world-class system adopted by animation companies around the world.

DAB has an extensive network of over 150 partnerships with key industry and government organisations, including Google and Westpac. These connections provide the unique opportunity to work on real-world projects, with many degrees involving industry placements. Industry partners also regularly sponsor or attend end-of-year exhibitions and shows.

## DESIGN & ARCHITECTURE PATHWAY INTO UTS

The Design & Architecture pathway you take into UTS will depend on your academic qualifications.

**High School**
Minimum HSC subject average* of:
8 month diploma = 75%

# REASONS TO STUDY DESIGN & ARCHITECTURE AT UTS:INSEARCH

## Credit recognition points*

Students who successfully complete their diploma will receive 36-credit-points towards all Design, Architecture and Building degrees at UTS.

## Study in the heart of Sydney

Located in Sydney's central business district, the campus is surrounded by popular cafe's and restaurants, galleries, theatres and shops. It is also easily accessible via public transport networks.

## Subjects are co-written by UTS

The subjects are designed in collaboration with the renowned UTS Faculty of Design, Architecture & Building so you will have an innovative education experience right from the start of your diploma.

## Design or Architecture streams

The Diploma of Design & Architecture offers two streams. Students wishing to study Architecture or Landscape Architecture at UTS will select to study the Architecture stream. For all other UTS design degrees, students will select to study the Design stream (Interior and Spatial Design, Visual Communication, Animation, Fashion and Textiles, Integrated Product Design and Photography and Situated Media).

## Supportive learning environment and caring culture

Small class sizes and a supportive learning culture that includes access to Academic Advisers and study skills workshops means that you will have guidance throughout your studies.

## Tutorials are engaging and highly interactive

We use a combination of traditional classroom teaching and online learning. This interactive approach improves learning outcomes and means you will be even more engaged with your studies.

*Subject to successful completion of a diploma with the required Grade Point Average (GPA).
